

eduScrum Workshop- Warsaw, 16th-17th of February 2018

Dear Participants,
The training is hands-on (NO POWERPOINTS) such as the students in eduScrum experience too. The teachers also experience the power of eduScrum and the iterative process.

Our training consists of two days, I let experience teachers on the first day what is eduScrum and what you can achieve.

We do this by teaching the basis of one or more cases eduScrum. We can also have teachers to experience eduScrum by making them their own lessons or projects scrum (with colleagues in the same section or even with colleagues with different expertise thus learn with and from each other, by looking through different glasses).

I do this in consultation with the teachers on the first day of training.

The Scrum principles, values and the whole eduScrum process we go through in the first training.

This has the result that the teachers get their hands on the tools after the first day to start.

In the 2nd training day the teachers start and learn to experience what works well and less well to share experiences and learn from them. Furthermore, we continue on the floor and background eduScrum the resistors that teachers are experienced and how there to deal with.

I work daily with eduScrum in all my classes and still learn most of my students.

Continue the teachers experience by 'Practice what you Preach' or an address multiple cases with eduScrum in sprints.

Afterwards the teachers receive a certificate.

If you have any questions or queries, please let me know. Also you find more info on our site.
